Gallery Shane & Phoebus

by Phoebus

Another fine art gallery is the one created by *Phoebus* to display the art created by himself and his lovely wife *Shane*. Besides fine art, Shane also has a love of fast cars, as evidenced by the beautifully rendered Ferrari parked outside.

The wonderful use of curves in the many pieces of art stands out, for example in a beautiful sculpture depicting two hearts wrapped in an infinity symbol.

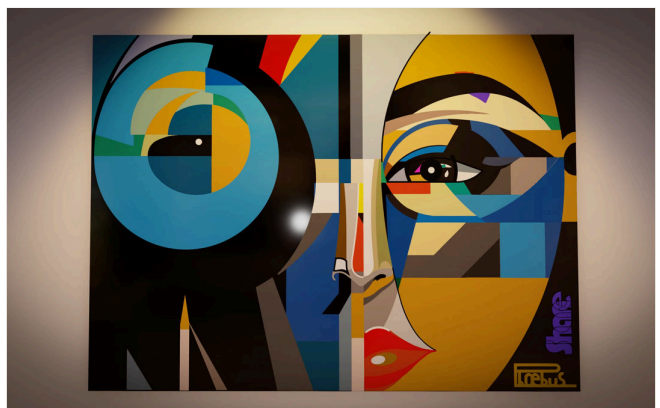

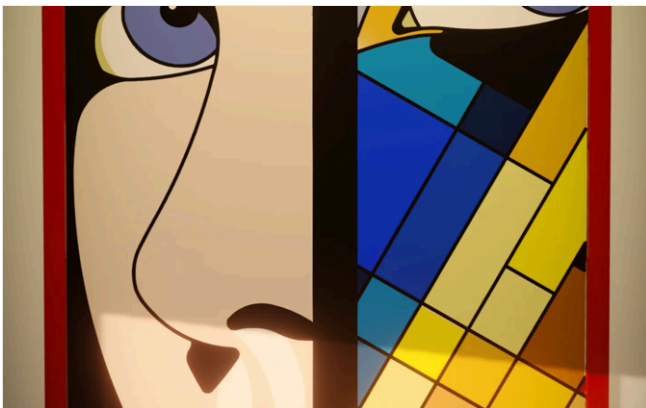

One corner of the gallery is dedicated to erotic sculptures, a nod to the *museum of sex room* Phoebebus also hosts. Regular 3DX players will recognise some of the poses depicted by the figurines.

The paintings in pop-art style that line the walls of the gallery were created by Phoebus based on designs by Shane. For these she used AI tools, showing us how this new technology can also be useful for room building in 3DX. Each of these pieces took between 10 and 20 hours to create.

When we met she came to visit my first gallery. She opened one just after that and then we decided to join our effort. Phoebus

This last piece was not designed by Shane but is a portrait of her created by Phoebus. To view more of these lovely paintings we encourage you to pay this stylish gallery a visit.
